

Petroff Follow Focus

Petroff follow focus comes in two modifications - standard and reversible.
It features snap-on base for fast clamping onto any type of rods and
it can be operated on either side of the lens.

Standard

For use with standard lenses.
Does not have the option of reversing
the rotational direction.

Reversible

More sophisticated version made with

helical bevel gears

for smooth, no-play movement.

It has the option of reversing the rotational
direction for use with some Nikon, Tamron and
Tokina lenses whose focus barrels turn the opposite
direction of traditional cinematography lenses.

Follow focus studio base

For use with studio supporting
systems having 19x104 or
15x100mm rods.

Follow focus gears

Available in a wide variety of sizes to fit any lens .

Lens gears

For lenses that don't have geared focusing barrel.
